EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows: (acknowledged previously by the applicants as claims 19-26 drawn to non-elected claims without traverse):

Please cancel claims 19-26.

DETAILED ACTION

Remark

1. Claim 2 was canceled, and claims 1, and 3-18 are for reconsideration.

Allowable Subject Matter

2. Claims 1, and 3-18 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Locascio fails to teach or suggest a system and its corresponding method for providing security in a group communication network, receiving an encryption key; encrypting media for transmission to a controller using the received encryption key and providing to another communication device; and particularly, Locascio does not further teach wherein the encrypted traffic includes additional headers used to synchronize an encryption/decryption process; accommodate late synchronization; confirm that a sender and receiver are using identical traffic encryption keys; and if the communication device receives media traffic that is not encrypted on a net for which it is configured to encrypt or if the traffic is not decrypted correctly, the communication device signals an alert and mutes traffic as cited in claims 1 and similarly in claims 7, 10, and 13. In addition, Mallela (US Patent 6,944,299 B1) does disclose the synchronization in encryption between two communication terminals, but Mallela is silent in other features, i.e., the steps of "accommodate late synchronization; confirm that a sender and receiver are using identical traffic encryption keys; and if the communication

device receives media traffic that is not encrypted on a net for which it is configured to encrypt or if the traffic is not decrypted correctly, the communication device signals an alert and mutes traffic” as described therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Saito (PTO-892 attached) disclose synchronization in encryption/decryption technique.
